DISPOSITION INSTRUCTIONS

Consolidated Intelligence Resources Information System - CIRIS is being developed to identify the resources and the interrelationships among: (a) the Organizational Components in the intelligence business, i.e., the units or other organizational entities; (b) the Functions and Activities carried out by those organizational components; and (c) the Targets or Objectives against which these activities are directed. These interrelationships are expressed in terms of dollars and manpower programmed by fiscal years. The data and the language employed tie in with the PPB systems in Defense and CIA. Data are obtained from CIA, State and the intelligence programs in DoD whose resources are displayed in connection with the Consolidated Defense Intelligence Program (CDIP). Users of CIRIS include DASD (I) in connection with CDIP reviews, DCI/NIRB, the National Intelligence Resources Board (NIRB), (the latter being responsible for directing the further development of CIRIS and the custody and use of these data) and Intelligence Program Managers.
